Nanyang Kopi

Kopi (pronounced Koh-Pee) is the Singaporean and Malay word for coffee. Nanyang Kopi is coffee done the Singapore way.

Unlike most western coffee brews, which are mostly made with Arabica beans, Kopi is made with Robusta beans, which contains a higher dosage of caffeine. To enhance their flavour, the beans are roasted in a wok with sugar. This caramelises the beans and gives them a unique aroma, and also produces Nanyang Kopi's characteristic sheen and bold chocolatey fragrance. The beans are then coarsely ground, steeped in hot water and strained through a 'coffee sock' (a cotton cloth filter) to create a smooth Kopi brew.

If you are still not convinced, then please let us know and we will happily let you try a sample, on the house.

Our Kopi is imported from small artisan roasters in Singapore, who use Robusta coffee beans from Indonesia.

Kopi - £3.8

Kopi brew, 2 tbsp sweet condensed milk. (Less sweet opt)

(Ve opt: Coconut condensed milk)

The iconic and traditional coffee of Singapore! If you've never tried Singapore Nanyang Kopi, this is where we recommend you start.

Kopi-C - £3.8

Kopi brew, 2 tbsp evaporated milk.

A lighter & less sweet option to using condensed milk. Evaporated milk has a much thinner consistency, meaning a more milky coffee.

Kopi-O Kosong - £3.6

Kopi brew served black.

For coffee lovers who like their coffee black. Best enjoyed without sugar, this is a surprisingly smooth coffee without the typical sweetness found in other coffees.

Kopi Gu You - £4.0

Kopi brew, 2 tbsp condensed milk topped with a slice of butter.

Coffee with butter? Yes, you read that right. Served in Singapore long before 'bulletproof' coffee even became a thing. This sublime concoction is now only made by a handful of Singaporean Kopitiam's.

Iced

Kopi Peng - £4.2

Kopi brew, 2 tbsp condensed milk poured over ice.

This is how iced coffee should be. There is no loss of strength or flavour, no timid flavours on the palate. This is sweet iced coffee the Singaporean way.

Welcome to Singapore Coffee House

We insist on using the most traditional Singaporean ways to make our coffee and tea. This means that there are no machines involved, just the hand craft skills of our Kopitiam baristas. If you are looking for something more closer to home, we also offer some contemporary favourites.
